Make Your Own Snake

Material:

- Construction Paper (Choose Colors/Patterns You Want Your Snake To Have)
- Glue/ Stapler
- Scissors
- Ruler
- Marker
- Googly Eyes

Objective: Explorers will use their creativity skills and make their own snake!

Lesson:

- First, take a piece of construction paper and hold it horizontally. Cut roughly 1-inch thick strips.
- You will need to repeat this at least one more time. (The longer you want your snake, the more repetitions you will have to do of step one)
- Explorers can then color/design these different pieces before assembly if desired
- Once complete, take one strip of construction paper at a time and glue or staple the two ends together creating a circle.
- Interlock the next piece of construction paper and begin creating a chain
- Keep going until you are satisfied with the length of your snake
- Take a final piece of construction paper and cut out a head, tongue, and tail
- Attach these to your snake's body
- Add googly eyes and let dry
